4 worked shards

POSTED

COMMENTS/DESCRIPTIONS: A difficult lot, shards very widely in erosion, almost unidentifiable to extremely. There is an orange coating on everything; Jicaco, Magdalena, Monte Grande, grade into one another, and Monte Grande looks like reddish yellow to via versa. Shards and fragments are damaged. (Chilanga) Urraco, Chandlen are in the best shape. Lots of things look like they are shards, I saw 28 out of the lot. Jungwillo are more red than orange, but very thin. Magdalena
